Educational
target plan

Authorised and Regulated by the National Insurance Commission RIC No. 025

PRODUCT OVERVIEW

Educational Target Plan is a product, primarily designed to meet the dual objective of every parent – saving towards a child's future and securing this future, despite the tragedies of life. There is an option to purchase Critical Illness (Stroke, Heart Attack, Kidney Failure, e.t.c.) and Accidental Permanent & Total Disability risk covers. The desired target may include:

- Future educational expenses for your child(ren)
- A regular benefit paid to your child upon reaching a fixed age
- An inheritance benefit for your child(ren)
- Any other purpose you deem fit.

THE BENEFITS

Death Benefit

Should death occur during the policy term, the target amount (sum assured) is payable as a lump sum and the policy terminates.

Accidental Total & Permanent disability (Optional):

Should owing to an accident, the policyholder become disabled under the conditions covered and during the policy term, the target amount (sum assured) is payable as a lump sum and the policy terminates.

Critical Illness (Optional):

Should the policyholder become disabled under the conditions covered and during the policy term, the target amount (sum assured) is payable as a lump sum and the policy terminates.

Maturity:

- Upon survival to the end of the policy term (maturity), provided the policy is paid to date, the target amount (sum assured) is payable as lump sum and the policy terminates.
- The lump sum payable on maturity could be converted into an annuity payment to fund a regular expense.
- In the event that on maturity, the premiums are not up to date, benefit payable shall be the paid up value due as at the paid to date of the policy.

THE FEATURES

- Contributions into this plan will be specified by Leadway, based on the amount required to meet the desired target and the desired payment frequency, subject to reviewable minimum annual contribution amount of N120,000.
- This policy qualifies for tax relief thereby reducing your tax incidence.
- The minimum policy term is 3 years. The policy can be surrendered at any time. However, surrenders attract charges according to the surrender factor rate table in the policy document.
- If premium/contribution payments stop under this

contract, the risk component of this policy would cease (lapse) after a 30 days grace period. Upon death after the grace period, the paid up value is payable. For a paid to date policy however, the Target (sum assured) is payable.

- Minimum entry age is 18 years, maximum age at entry is such that the policy ceases at age 65 for Life and PTD covers and age 60 for covers including critical illness.

HOW IT WORKS

- With the regular or single premium you pay, a deposit account will be funded to ensure you receive your Target amount at maturity.
- A portion of these premiums will also be used to fund a risk cover to ensure your target is assured upon occurrence of death or any other insured risk, during the policy term.
- The target is only payable, if there is no withdrawal and premiums are paid on time. Late premium payments will attract late payment charges to make up for lost interest.

FREQUENTLY ASKED QUESTIONS

- **Does my contribution accrue interest from the date of payment?**

This is a DEFINED BENEFIT policy and not a savings policy. We invest portions of your premium towards meeting our obligation on your maturity proceeds. Provided premiums are paid as and when due, Leadway guarantees that your sum assured shall be paid as and when due.

- **What happens if I miss a payment?**

Non-payment of premiums on their due dates shall attract late payment charges, to make up for lost interest. This is currently 10% per annum on delayed premiums, prorated for the number of days delayed. The rate is subject to change at any time by Leadway. If the period of non-payment exceeds a year, Leadway reserves the right to re-assess the risk before renewing cover.

- **What are my options for the Guardian of my child?**

In this policy, the beneficiary represents the person to whom you would want the benefit to be paid directly to. This could be your spouse, relative, child's school, Trustee or Parent Teacher's Association of your child's school. We advise you nominate a Guardian-at-law to administer the benefits in your stead where the child is a minor.

- **What will I get on a maturity if a 5 years policy with a target of N10million is paid up to only 3 years?**

Your revised maturity benefit will be $3/5 \times N10m = N6m$ at maturity.
